

CARBON MANAGEMENT

Policy Statement	Rev 10
Issue Date	10/01/2022

Signed:

Eamonn Laverty
Chief Executive
Officer

In moving towards Sustainable Development, McAleer & Rushe Contracts UK Ltd recognise its responsibility for managing and reducing its carbon emissions. We are committed to ensuring that Carbon Management is embedded as a core principle in its delivery of services to our customers, and to minimising the impact of our operations on the environment. In particular we commit to:

- Annually measure, assess and report emissions of Carbon Dioxide (CO2) and associated greenhouse gases
- Identify opportunities to reduce these emissions and set targets to do so
- Reduce energy use in our building and construction sites
- Promote efficient energy use in our buildings and Construction sites
- Ensure efficient use and management of utilities which will in turn minimise consumption, expenditure and environmental impact without compromising comfort levels and energy requirements
- All site accommodation to include energy efficiency measures
- Ensure monthly monitoring and reporting on energy use, costs and associated emissions to Senior Management
- Encourage the use of energy produced by alternative means, including solar power, wind turbines and renewable sources. Consider the energy usage implications of all Design and Build projects, promoting design that lowers carbon emissions and in use and work to achieve net zero carbon buildings
- Ensure all McAleer & Rushe offices, construction sites and plant are maintained to provide good practice energy use. Promote the use of electric and hybrid technology where possible.
- Encourage the use of more sustainable forms of transport across our operations and reduce delivery movements through effective logistics management
- Encourage the use of teleconferencing facilities where possible
- Promote public transport options to staff and members of our supply chain
- Ensure that our staff are engaged and aware of their responsibility to reduce carbon emissions.
- Encourage the management and reduction of carbon emissions within our supply chain
- Allocate responsibility for the management of this policy at Senior Management level.

Through the adoption of this policy, McAleer & Rushe will educate and inform its customers, suppliers, staff and the wider public of the benefits of taking an environmentally sound approach to business through improved energy efficiency, reduced greenhouse gas emissions and lower operational costs.
